Context

The importance of tourism to economies is well recognised. As a result, when tourism changes or policy shifts are being considered, there is an interest in determining what impact on the economy they might have. Techniques such as input-output analysis and social accounting matrix analysis are very commonly used to make estimates of the economic impact of changes in tourism expenditure. Tourism Satellite Accounts measures the contribution of tourism to the economy. Computable General Equilibrium models go much further than the previous models and are now extensively used to estimate economics impacts of a wide variety of changes and policies.

Requirements

There is no requirements

Skills

Specific

- * CE4 To be able to contribute to the planning, monitoring and evaluation of policies, programmes and projects oriented towards the improvement of the competitiveness and sustainability of a tourism company, destination or region
- * CE7 To be able to collect, generate, process and analyse statistical data to support monitoring and evaluation activities
- * CE10 To develop skills that facilitate integration into labour markets related to the tourism industry and, especially, to the companies and institutions that monitor and evaluate projects and programmes in the tourism environment

2019-20 11495 - Analysis of Economic Impacts Group 1

Generic

- * CG2- To develop an innovative capacity by applying the acquired knowledge to the resolution of problems in new environments related to the tourism sector
- * CG7- To acquire specialized knowledge about the tourism system to make it possible to face challenges and provide solutions
- * CG8 To know how to apply information and communications technology (ICT) in the context of tourism projects

Basic

* You may consult the basic competencies students will have to achieve by the end of the Master's degree at the following address: <u>http://estudis.uib.cat/master/comp_basiques/</u>

Content

Range of topics

I. Introduction

The growing role of tourism in the economy

The economic impact of tourism

II. System of European National Accounts and Regional Accounts Introduction to the System of National Accounts

Main aggregates

Units of production and institutional units

Production activities

Distribution operations

Basic identities

III. The Input-Output framework

Concepts and structure of an I-O table

Technical coefficients

Determination of equilibrium quantities and economic impacts

Measurement of impacts on prices, production and employment

Measurement of impacts on profitability and productivity

GAMS excercises

IV. Tourism Satellite Accounts Brief history of TSA

Key concepts

General compositions TSA

V. Social Accounting matrix (SAM) and SAM models Social accounting matrices

2/6

Date of publication: 18/06/2019

2019-20 11495 - Analysis of Economic Impacts Group 1

Accounting multipliers

Tourism multipliers

A comparison of input-output and SAM models

GAMS exercise

VI. An introduction to applied general equilibrium models What's an AGE model

Design of an AGE model

Numerical specification

Policy simulations

GAMS exercises

Teaching methodology

In-class work activities (0.72 credits, 18 hours)

Modality	Name	Typ. Grp.	Description	Hours
Theory classes	Theory	Large group (G)	Introduction. System of European National Accounts and Regional Accounts. The input-output framework. Tourism Satellite Accounts.Social accounting matrix(SAM) and SAM models. An introduction to applied general equilibrium models.	10
Practical classes	Software	Large group (G)	GAMS	6
Assessment	Simple general equilibrium model	Large group (G)	Introduce government (GAMS)	2

At the beginning of the semester a schedule of the subject will be made available to students through the UIBdigital platform. The schedule shall at least include the dates when the continuing assessment tests will be conducted and the hand-in dates for the assignments. In addition, the lecturer shall inform students as to whether the subject work plan will be carried out through the schedule or through another way included in the Aula Digital platform.

Distance education tasks (2.28 credits, 57 hours)

Modality	Name	Description	Hours
Individual self- study	Rasmussen	Rasmussen indexes (GAMS)	10
Individual self- study	Simulation	Demand simulation (GAMS)	10
Individual self- study	Economic report	Report	10

Academic year Subject Group 2019-20 11495 - Analysis of Economic Impacts Group 1

Modality	Name	Description	Hours
Individual self- study	Main aggregates	Manipulation of a symmetric table to obtain the main aggregates (GAMS)	10
Group or individu self-study	al Studying	Study	17

Specific risks and protective measures

The learning activities of this course do not entail specific health or safety risks for the students and therefore no special protective measures are needed.

Student learning assessment

Frau en elements d'avaluació

In accordance with article 33 of Regulation of academic studies, "regardless of the disciplinary procedure that may be followed against the offending student, the demonstrably fraudulent performance of any of the evaluation elements included in the teaching guides of the subjects will lead, at the discretion of the teacher, a undervaluation in the qualification that may involve the qualification of "suspense 0" in the annual evaluation of the subject".

Simple general equilibrium model

Modality	Assessment
Technique	Student internship dissertation (non-retrievable)
Description	Introduce government (GAMS)
Assessment criteria	You have to introduce government in a simple applied general equilibrium model

Before printing this document, please consider whether or not it is necessary. We all share the environment.

Final grade percentage: 20%

Rasmussen

Modality	Individual self-study
Technique	Objective tests (non-retrievable)
Description	Rasmussen indexes (GAMS)
Assessment criteria	You have to obtain Rasmussen indexes

Final grade percentage: 20%

4/6

Date of publication: 18/06/2019

4

2019-20 11495 - Analysis of Economic Impacts Group 1

Simulation

Modality	Individual self-study
Technique	Objective tests (non-retrievable)
Description	Demand simulation (GAMS)
Assessment criteria	You have to study what would be the consequences of a specific impact on the economy.

Final grade percentage: 20%

Economic report

dividual self-study
pjective tests (non-retrievable)
eport
ou have to elaborate and economic report

Final grade percentage: 20%

Main aggregates

Modality	Individual self-study
Technique	Objective tests (non-retrievable)
Description	Manipulation of a symmetric table to obtain the main aggregates (GAMS)
Assessment criteria	You have to obtain value added, production , intermediate demand. You have to obtain an inverse matrix in GAMS

Final grade percentage: 20%
